eccos pro at Interbad 2006 in Düsseldorf, Germany

At this year's Interbad fair, eccos pro presented its complete range of guest management services and solutions for leisure centres, hotel and health centres. Frank vom Endt, managing director of Velberter Systemhaus was impressed, not only by the number of trade fair contacts, but also by their quality. "In comparison to earlier shows, the discussions with architects and operators had, almost without exception, a background of actual planning. Hardly anyone who visited the stand was "just browsing". Visitor numbers at the fair were however unevenly spread: at busy times we could hardly keep up, even though we had almost twice the number of staff working on the stand, but the poor attendance on the Saturday shows that it would be advisable to shorten the fair by one day."

You can visit our "virtual stand" and follow our interactive tour to get information about the products and services displayed for the first time at the show.
